

SURYA PRASATH S

Software Developer | AI & ML Engineer

Phone +91-9042761228 | suryaprasathsekar2005@gmail.com | linkedin.com/in/surya-prasath0811 | Coimbatore, Tamil nadu

PROFESSIONAL SUMMARY

Driven Software Developer skilled in Python, Java, MySQL, and web technologies, with a strong focus on building intelligent and scalable applications. Knowledgeable in machine learning, database management, and modern development practices, including agile methodologies and design thinking. Holds certifications in MongoDB, Microsoft AI Fundamentals, and Design Thinking. Committed to using Artificial Intelligence and automation to create practical, real-world solutions.

EDUCATION

BE - Computer Science & Engineering (AI & ML)	-Sep 2023 – Present
Rathinam Technical Campus, Coimbatore	
CGPA: 7.5 / 10.0	
Higher Secondary Certificate (HSC)	-Jun 2022 – May 2023
Model Higher Secondary School, Mulanur	
Score: 75.6%	

TECHNICAL SKILLS

Programming Languages	Python, JAVA
Web Technologies	HTML5, CSS3, JavaScript
Databases	MySQL, MongoDB (NoSQL)
AI / ML Tools	Jupyter Notebook and Google Colab
Developer Tools	Git, GitHub, VS Code, Streamlit
Concepts	Machine Learning, OOPS, Design Thinking
Soft Skills	Leadership, Communication, Creativity and Team Collaboration

PROJECTS

1. AI-Powered Intelligent Task Management System :

Developed an AI-powered Task Management System that helps users organize, prioritize, and track tasks efficiently. The system uses Machine Learning and NLP concepts to categorize tasks, predict priorities, and manage deadlines automatically. Built using Data Structures and Database Management techniques for efficient task storage and analysis. The project improved productivity through smart task recommendations and enhanced my AI and application development skills.

2. Smart Load-Based Vehicle Recommendation System :

Developed a Smart Load-Based Vehicle Recommendation System that recommends suitable vehicles based on load capacity, distance, and availability. Built using HTML, CSS, JavaScript, Node.js, and PostgreSQL to streamline logistics operations and reduce manual effort. The system uses database querying, filtering algorithms, and capacity optimization techniques for accurate vehicle matching. This project enhanced my skills in full-stack development, database management, and problem-solving.

CERTIFICATIONS

Microsoft Certified: Fundamental AI Concepts — Microsoft
MongoDB Basics — MongoDB University Design
Thinking for Innovation — University of Virginia (Coursera)

WORKSHOPS

CISCO NETWORKING WORKSHOP – KPR Institute of Engineering and Technology
